

ATTENTION: Owners/Managers of Hotels, Gyms, Clubs & other Commercial Facilities

**There is a choice of Sauna Heater types for your facility,
depending on your preferred use of the sauna room:
Hot with High Steam Output OR Hot Dry / Low Steam Output.**

HOT SAUNA WITH HIGH STEAM OUTPUT

- Polar / Finnleo / Helo 'PRO' type floor standing sauna heaters are **best for high steam output** by pouring water on heater rocks.
- PRO heaters utilize 132 pounds of Vulcanite Sauna Rocks set in between rows of heating elements, ready to convert water into almost unlimited steam.
- Stainless steel shroud and top cover for long lasting beauty and function.
- Control panel options are: Standard dial style controls with temperature dial and 60 minute or 9 hour pre-set timer. Digital control panel with programmable modes of operation.
- Minimal down time: replacement parts (elements, etc.) are readily available at reasonable prices.
- Best warranty in the Sauna Heater business.

HOT SAUNA W/ DRY OR LOW STEAM OUTPUT

- Scandia wall mounted Sauna Heaters are **best for dry or lower steam output** saunas.
- Works great in saunas that allow no water on heater.
- Scandia heaters hold 50 pounds of rocks, heated by convection. Water can be poured on rock tray for a decent amount of steam.
- Top solid rock steamer tray keeps water out of electrical elements and components.
- Preferred Choice for YMCA, PowerHouse Gym, Gold's Gym & Bally Total Fitness Commercial Saunas.
- 100% Stainless Steel, Commercial Grade Corrosion Free Product Line.
- Convection Air-Flow heats sauna faster for increased energy efficiency.
- Lower maintenance when used with little or no water. Replacement parts are readily available.
